

RUMEVITE® FERMAFOS LICK

A high performance phosphorus, macro and trace mineral loose lick for cattle, sheep, goats and horses grazing green feed where mineral deficiencies may be limiting animal performance.

KEY FEATURES

- High levels of phosphorus.
- High levels of calcium and trace minerals.
- Palatable loose lick to attract livestock grazing green feed.

FEEDING ADVICE

Feed free choice in troughs at the following rates:

- **Cattle and horses:** usual intake 60-150 grams/head/day (if consumption consistently exceeds 150 grams/head/day contact the Customer Service Centre on 1300 66 657).
- **Sheep and goats:** usual intake 10-20 grams/head/day (if consumption consistently exceeds 20 grams/head/day contact the Customer Service Centre on 1300 66 657).
- Ensure a plentiful supply of green pasture is available when feeding this product.
- Pour Rumevite Fermafos Lick into troughs and allow stock free access.
- Troughs should be well drained and covered to protect from the weather. Do not allow the product to become wet.
- No other copper supplements should be fed in conjunction with this product.
- This product should not be used when animals are already copper sufficient, or have been grazing in pastures containing plants that cause liver damage.
