

RUMEVITE® PRO PHOS LICK

A 30% protein (9% urea) and mineral loose lick sheep and cattle grazing high volumes of maturing and dry pasture in extensive country.

KEY FEATURES

- Can be used for both sheep and cattle.
- Contains high levels of phosphorus, sulphur and sodium for mulga country.

FEEDING ADVICE

- Ensure a plentiful supply of maturing or dry pasture is available when feeding this product.
- Pour Pro Phos loose lick into troughs and allow sheep and/or cattle free access.
- Trough should be well drained and covered to protect from the weather. Do not allow the product to become wet.
- Locate troughs a minimum of 30 metres from watering points. Once stock are consuming the loose lick, if possible move troughs out further from watering points. This will aid in avoiding over consumption and encourage stock to graze out, utilising available paddock feed.

Cattle:

- Usual intake 100-200 grams/head/day.
- As consumption increases, cattle can be changed over to Rumevite SSS Dry Season 48 loose lick.

Sheep:

- Usual intake 10-30 grams/head/day.
- If consumption consistently exceeds 30 grams/head/day contact the customer service centre on 1300 666 657.
