

RUMEVITE®

SSS WET SEASON 40 10 LICK

Higher protein supplement for deteriorating wet season pastures in phosphorus deficient country.

KEY FEATURES

- High phosphorus lick suitable for feeding early in the wet season.
- Suitable for breeders and growing cattle.
- Contains bitter tasting ammonium sulphate to regulate intake.

FEEDING ADVICE

- Usual intake 30-150 grams/head/day.
- Feed *ad lib*. Pour into troughs and allow cattle free access.
- Protect from water- provide cover and drainage.
- Locate away from watering points to avoid over consumption and encourage stock to graze out utilising available paddock feed.
- This product contains urea. It may be necessary to take precautions with feeding certain stock.
- Ensure plenty of green pasture is available when feeding this product.
