

# SSS WET SEASON 40 10

A 10% phosphorus loose lick containing 8% urea for cattle transitioning from wet to dry season pastures on phosphorus deficient country.

## KEY FEATURES

- High phosphorus lick.
- Contains urea and sulphur for cattle grazing wet season pastures that are declining in quality.

## RECOMMENDED INTAKES

- Usual intake 30-150 grams/head/day.
- If intakes consistently exceed recommended rates, contact the Ridley Customer Service Centre on 1300 666 657.

## FEEDING DIRECTIONS

- Ensure a plentiful supply of green pasture is available when feeding this product.
- Pour Rumevite® SSS Wet Season 40 10 into troughs and allow stock free access.
- Troughs should be well drained and covered to protect from the weather.
- To avoid over consumption, locate troughs a minimum of 30 metres from watering points. Once stock are consuming the loose lick, if possible move troughs further out from watering points to encourage grazing out and utilisation of available paddock feed.

## SAFETY & OTHER INFORMATION

- This product contains urea, which can be toxic if taken in excessive quantities or too quickly. Urea based products should only be fed as part of a complete supplementation program as urea can cause death to stock which have not been gradually exposed to it, or if intakes are excessive.

## CLASS OF STOCK

## PRESENTATION

- 25 kg

## ANALYSIS (AS-FED)

|  |          |
|--|----------|
| Total Crude Protein and Equivalent Crude Protein (Min) | 40%      |
| Crude Protein (Min)                                    | 4%       |
| Equiv. Crude Protein (Min)                             | 36%      |
| Urea   | 8.2%     |
| Salt [NaCl] (Added Max)                                | 15%      |
| Crude Fibre (Max)                                      | 5%       |
| Crude Fat (Min)  | 0.1%     |
| Calcium [Ca] (Min)                                     | 10%      |
